

DRONE POLICY
Updated 2/25/16

Due to safety and privacy concerns, Jiminy Peak Mountain Resort prohibits the operation or use on or above Resort property of unmanned aerial systems, or drones, by the general public — including model aircraft by recreational users and hobbyists — without the prior written authorization from Jiminy Peak Mountain Resort. This prohibition includes drones used for filming or videotaping, as well as any drone used by media or journalists operating above or within the Resort boundaries. This prohibition extends to any devices launched or operated from Resort property, as well as any launched from private property outside of the Resort boundaries. Please contact the Jiminy Peak Marketing Department if you have any questions or if you seek prior authorization to operate any of these devices. Any authorized operation of drones on or above Resort property will be governed by Federal Aviation Administration (FAA) rules and regulations, local law enforcement, as well as those policies separately established by this Resort, which may include certification, training, insurance coverage, indemnification requirements, and waivers or releases of liability. Any violation of this policy may involve suspension of your access privileges to the Resort, or the revocation of your season pass, as well as confiscation of any prohibited equipment, and may subject violators to any liability for damages, including damages for trespass, violations of privacy, and physical injuries to persons and/or property, as well as legal fees.
